Modiano	1426

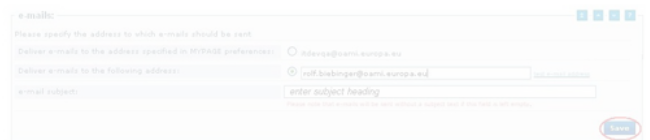

**E-business at OHIM**  
New "watch" service for MyPage users

Users of MyPage, the password-protected platform making it easier to do business with OHIM, have had access to a new feature allowing them to track the progress of CTM applications and International Registrations since 2 October.

The CTM Watch service allows users to select any CTM application or International Registration and receive an e-mail alert when the status changes. Users can use the filter options to easily define their display settings, and e-mail alerts are set by specifying the subject and e-mail address in the e-mail settings section.

CTM Watch will automatically send e-mail alerts either to the newly specified e-mail address or to the existing e-mail address already stored in MyPage platform

In the next step, a list of CTMs/IRs can be created by simply entering the CTM/IR number or starting a search in the CTM-ONLINE link.

Finally, choosing alert triggering statuses can easily be done with a few clicks in the list of selected CTMs or IRs.
